GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Re: 332;KSN:S8122

Dear Mr. Nodohara:

I am completely befuddled with your letter of May 31 stating, "We were informed by Trevarion C. Merrifield that you are now owners of property which the Statement (8122) serves."

I have in my files a letter from the Division of Water Rights dated October 12, 1979 pertaining to application 23584 which states, "We are changing our records as requested by the Merrifields to show ownership as follows: G. Mark Groves." And later, in 1982, I was sent the Statements of Water Diversion and Use for 2527 (an unnamed spring) and 2528 (Halls Gulch) which I completed and forwarded to your office.

The sale of the subject property from the Merrifields took place in March of 1979 and the State Water Resources Control Board was informed of this fact shortly thereafter. I have no idea what precipitated this latest flurry of activity nor am I aware of either Statement #8122 or 8132.

I received a telephone call from someone in your office a few weeks ago and I tried to explain that there must be some sort of computer error. Merrifields, it seems, were notified of an application to withdraw water from a stream in Lassen County and they replied, I was told, that they own no property in Lassen County. Later it was determined that there was a mix-up with the numbers and Merrifield informed your office that he had sold the property which is served by Halls Gulch to me and assumed that was, in fact, the Water Diversion and Use which had been confused. He was sent some sort of form to sign relative to the property transfer which he then returned, knowing that he had signed a similar form ten years previously.

It is all totally confusing.

Very Sincerely,

Mark Groves
